Building a Private Equity Portfolio today

Critical Components: Co-Invest, Secondaries & ESG

Building a robust portfolio of Private Equity assets requires a long-term mind-set as well as an appreciation for the ever-changing opportunity set dictated by global markets. While academic research and performance ranking tables give insights into what has occurred in previous environments, investors must make decisions today, in the face of new uncertainties. This SECA webinar, offered in cooperation with employee-owned Neuberger Berman, provides insights drawn from decades of practical experience and on-the-ground global engagement. Long-term commitment to the asset class is balanced with capital efficient, tactical opportunities and an integration of ESG value creation.
