Friday, 4 December 2020, 16:30 – 18:00 CET  
Webinar, dial-in link will be sent few hours before

# Nuclear Fusion

Clean, Safe, Abundant, Sustainable,  
Cost Effective, Forever

Space is exciting. Technology is cool. Healthcare is a must. Economic stability is critical. Education is crucial. Clean air and water are essential. To have it all, you need energy: clean, sustainable, safe, cost effective, ubiquitous, and abundant. The energy of the stars – fusion – is our greatest hope (Forbes). Fusion safely produces clean energy with no greenhouse gases, no radioactive waste, no environmental degradation, and no competitor that even comes close. Fusion has been in R&D mode for many decades, but now it is finally coming closer – out of the labs and into our lives. Public and private initiatives are making tremendous strides; perhaps within ten years we will see this marvel of marvels blossom into the world. Join us for a special webinar with global thought leaders as we explore the challenge of clean energy.
