The Future of Private Markets – Unlocking Broader Access

This event will spotlight how Private Markets are increasingly shaping investment strategies, especially in comparison to traditional public markets. We'll dive into the European regulatory landscape, where frameworks like the European Long-Term Investment Fund (ELTIF) are paving the way for broader investor access to private assets—something Switzerland is only beginning to explore.

Key Topics:

- How ELTIF is democratizing private market access in Europe
- Why Switzerland's regulatory environment is lagging—and what can be done
- The untapped potential of long-term savings in Switzerland
- Innovative ideas to integrate private markets into broader wealth strategies

Programm:

17:00 Registration
