About Remora Biotech

Remora Biotech is a biotherapy portfolio company with a track record of successfully turning science into life-changing biotherapies.

We focus on high-impact therapeutic areas including oncology, immunology, and regenerative and aesthetic medicine — while advancing next-generation modalities such as cell and gene therapies.

From product ideation to strategic partnerships with global leaders, we have created, developed, and financed 11 companies across Switzerland and France.

By building and advancing a diversified portfolio of companies, Remora Biotech is shaping the future of biotherapy and delivering meaningful impact for patients, partners, and investors.

Meet the Speakers

Dr. Jean-Marc Le Doussal
Founder & CEO

Serial entrepreneur and immunologist. Founded Remora Biotech in 2009 and several biotechs successfully monetized notably Fastox Pharma (sold to Abbvie), Atlab (sold to Telix), and Activen.

Dr. David Béchard
CEO Remora Biotech France

Serial entrepreneur and immunologist. Board Member of Remora Biotech. Notably founded Cytune Pharma (strategic minority investment of Remora Biotech), successfully sold to SOTIO / PPF Group.

Florian Le Thoër
Chief Corporate Development Officer

Corporate development executive. Ex-Director of UBS Global Visionaries accelerator. Notably originated UBS Next / Principal Investments unit within Corporate Development (Group Strategy and M&A).

Prof. Denis Migliorini
Scientific Partner — Cell & Gene Therapy

Physician-scientist, UNIGE Associate Professor and Head of HUG Neuro-Oncology Unit. ISREC Chair in Brain Tumour Immunology; trained at U. Penn (Carl June lab). Co-founder of Cellula Therapeutics.

Prof. Aurélien Marabelle
Scientific Partner — Immunotherapy

Medical oncologist & immunologist (MD-PhD), Professor at Université Paris-Saclay and head of the Translational Immunotherapy Lab at Gustave Roussy. Highly Cited Researcher.

Prof. Shukry Habib
Scientific Partner — Regenerative Medicine

Stem-cell biologist and Associate Professor at Université de Lausanne (ex-King's College London, Sir Henry Dale Fellow), pioneering technologies in stem-cell division, tissue formation, and regen. medicine.
